Multan, Pakistan | +92 3136725787 | mustajaabx@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology

Sep 2023 - Present

Bachelor of Science, Software Engineering

Topi, Swabi

- **GPA:** 3.0
- **Coursework:** Data Structures & Algorithms, AI, ML, Computer Vision, NLP, Database Systems, Web Development, Software Engineering

SKILLS

- **GenAI & LLMs:** LangChain, LlamaIndex, RAG (Retrieval-Augmented Generation), Hugging Face Transformers, Vector Databases (FAISS, ChromaDB, Pinecone), Prompt Engineering, LLMops, Agentic AI, LangGraph
- **ML/DL:** PyTorch, TensorFlow, Keras, Scikit-learn, NumPy, Pandas
- **AI Domains:** NLP, Computer Vision, Deep Learning, Transfer Learning, Model Fine-tuning
- **Data Science:** EDA, Data Cleaning, Feature Engineering, Model Evaluation, Statistical Analysis
- **Web Development:** React, Node.js, JavaScript, Tailwind CSS, PostgreSQL, REST APIs, Streamlit
- **Tools:** Git, GitHub, Jupyter, OpenCV, Python, LangChain

WORK AND LEADERSHIP EXPERIENCE

Microsoft Learn Student Club GIKI

2023 - Present

Web Development Team Member → Tech Head → LnD Head

GIKI

- Led **20-member team**, improving outreach and engagement by **30–50%**
- Organized Micathon (hackathon) with cross-team technical collaboration
- Contributed to web development systems and learning initiatives
- Improved digital presence through structured content and technical execution

SOPHEP (Society of Promotion of Higher Education in Pakistan)

2023 - Present

Tech & Sponsorship Subhead → GIMUN Liaison Head & Tech Head → President

GIKI

- Led **50-member teams** across large-scale academic events
- Managed sponsorship outreach, event operations, and technical execution
- Built event registration system handling **1000+ users**, reducing manual workload by **40%+**
- Coordinated cross-functional teams ensuring smooth execution of national-level events

PROJECTS

AI PDF Chatbot (RAG System)

- Built LangChain + RAG-based system for semantic document search over large PDFs
- Improved retrieval efficiency by **70–80%** using vector embeddings
- Developed Streamlit interface for real-time querying
- Technologies: Python, LangChain, LLMs, Embeddings, Vector Search, Streamlit

MindMate – AI Mental Health Platform

- Built NLP + CV-based system for emotion detection and student wellness insights
- Designed recommendation engine for productivity and mental health support
- Technologies: Python, OpenCV, Computer Vision, Machine Learning Basics

AI Resume Analyzer

- Automated resume parsing with **~90% structured extraction accuracy**
- Reduced manual screening effort by **60% using AI-based matching system**
- Technologies: Python, NLP, Transformer Models, LangChain, OpenCV, JSON

LooksMaximizer App

- Developed facial analysis system using OpenCV + ML
- Reduced image processing time by **~35% via optimized pipeline**
- Technologies: Python, OpenCV, Machine Learning Basics, Facial Analysis, Algorithm Design

Gikify – Campus E-Commerce Platform

- Built full-stack marketplace using React, Node.js, PostgreSQL
- Implemented secure authentication and REST APIs for transactions
- Technologies: React, Node.js, Tailwind CSS, PostgreSQL, REST APIs, JavaScript
